

## ELIMINATE

### LAVATORY CLEANING CONCENTRATE

DEPENDABLE SLUDGE REMOVAL FOR LAVATORY HOLDING TANKS & COMPONENT PARTS

*When using any NUVITE product, please refer to appropriate procedures and recommendations for use and equipment, or contact a NUVITE technician for more information, unique applications and special requirements.*

#### INTERNAL AIRCRAFT

1. Depending on sludge conditions, use ELIMINATE concentrate up to 1:5 dilution with a steam cleaning method or overnight soak.

#### SOAK

1. Fill Lavatory tank to splash guard.
2. Operate flush mechanism to distribute material.
3. After soak period, flush out tank thoroughly.
4. Refil with NUVITE's GOODBYE-NF to deodorize during flight.
5. Component parts can follow same procedure.
6. Agitate where possible.
7. Finish with final thorough rinse.
