

## NUGEAR SC

HEAVY DUTY ENGINE & COMPONENT CLEANER

Aqueous cleaning compound for aircraft engine and component degreasing operations

*When using any NUVITE product, please refer to appropriate procedures and recommendations for use and equipment, or contact a NUVITE technician for more information, unique applications and special requirements.*

### HAND CLEANING/LOCAL APPLICATION

1. Depending on soil conditions and cleaning frequency, dilute 1:4 to 1:10 with water.
2. Apply to surface in shallow wash tank or by mop or spray
3. Loosen surface material with non-metallic bristle brush, reapplying solution continuously.
4. Follow with water rinse, reapply if necessary.
5. Wipe dry with terry towel.

### HEAVY DUTY CLEANING/HOT IMMERSION TANK/SPRAY CABINET

1. Depending upon manufacturers Standard Practices Manual requirements, Use full strength or dilute 1:4-5 with water
2. Allow to soak at 120 - 140°F (49 - 60°C).
3. Effective concentration can be maintained with periodic addition of fresh NuGear SC.
