

Eliminate

LAVATORY CLEANING CONCENTRATE

Dependable sludge removal for lavatory holding tanks & component parts

INTERNAL AIRCRAFT

1. Use Eliminate full strength or up to 1:5* dilution, depending on sludge conditions with a steam cleaning method or overnight soak.

SOAK

1. Fill lavatory tank with **Eliminate** to splash guard.
2. Operate flush mechanism to distribute material.
3. After soak period, flush out tank thoroughly.
4. Refill with NUVITE's **Goodbye-NF** to deodorize during flight.
5. Component parts can follow same procedure.
6. Agitate where possible.
7. Finish with final thorough rinse.

**Product dilutions are determined by extent, condition & soil type.*

When using any NUVITE product, please refer to appropriate procedures and recommendations for use and equipment, or contact a NUVITE technician for more information, unique applications and special requirements.
