

NuPol

WATERLESS, DRYWASH HEAVY-DUTY CLEANER, PAINT RESTORER & UV PROTECTANT

For Seriously Soiled/Oxidation Surface Conditions

GENERAL CLEANING

1. Apply **NuPol** as is – DO NOT DILUTE by hand, with mophead or random orbital.
2. Agitate a small, 18"-24" area evenly with a thin layer of product.
3. Increased agitation will help the cleaning/deoxidizing action.
4. Allow to fully dry, NO MORE than 10 minutes.
5. Remove by polishing off with a mop head or dry terry cloth to shine.

**Product dilutions are determined by extent, condition & soil type.*

When using any NUVITE product, please refer to appropriate procedures and recommendations for use and equipment, or contact a NUVITE technician for more information, unique applications and special requirements.
