

NUVITE® offers a full line of high functioning, task-specific maintenance products for both exterior and interior surfaces, all engineered to address:

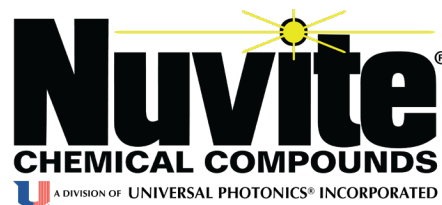

- Surface condition
- All levels of clean
- Enhance gloss
- Paint age
- Provide protection
- Appearance longevity

Routinely scheduled every 30-45 days, exterior appearance maintenance assures high performance in three critical areas: *surface condition, aerodynamic flow, and passenger comfort level.* One of the best ways to eliminate unnecessary service and repairs is preventative maintenance.

NUVITE CHEMICAL COMPOUNDS®, a leader in appearance maintenance products for more than 70 years, has one goal... To provide the most advanced cleaning and appearance maintenance products available.

Contact a NUVITE® service technician for accurate technical assistance. They will expertly match your needs to a proven NUVITE solution.

**BENEFITS BEYOND CLEAN...** Aircraft surface cleaning minimizes the impact of contaminants that cause & accelerate corrosion, retains aerodynamic efficiency & safety, increases public perception of quality/safety, reduces fire hazards, and helps retain functional characteristics of aircraft parts, like proper action of landing gear.

### WETWASH, CLEANERS & DEGREASERS

Some WetWash products are used for general, rinse less, wipe-down on small, local areas or as a debugger. When used this way, it is essential to thoroughly remove chemical-mixed soils. Remaining soap/soil residual will attract moisture & increase re-soiling.

**CitriCut® Concentrate** Citrus-based cleaner for wetwash, debugging & degreasing. Product dilution determined by extent, condition & soil type.

**CitriCut® Gel** Citrus-based degreaser clings to vertical & overhead surfaces.

**CitriCut® Xtra** Citrus-based cleaner for wetwash, wipe down/debugging, & heavy duty cleaning with protective sealant. Product dilution determined by extent, condition & soil type.

**SS9-3** Biodegradable cleaner for wetwash, debugging & degreasing.

**NuGear® SC** Aqueous cleaning compound for engine & component degreasing. Use for hand cleaning & hot immersion tanks or spray cabinets.

**Impact HD-III** Heavy-duty gel degreaser perfect for vertical & overhead areas.

Many WetWash products can be diluted depending on the extent, condition & type of soil to be removed & cleaning frequency.

### DRYWASH, GLOSS & POLISH

An efficient DryWash will deposit a UV protective barrier, enhance paint gloss & inhibit redeposition of soils. To facilitate these properties, be sure to allow appropriate "cure" time & set conditions as recommended by product manufacturer.

**NuPower II®** Easy APPLY • DRY • BUFF WATERLESS application. Effectively removes soil, dirt, carbon, lubricants, & more, while providing UV protection, high gloss, & extended coating life.

**NuPol®** Waterless, heavy-duty drywash removes stubborn carbon, dirt, stains, oil, & moderate oxidation from painted surface, while providing UV protection & restoring color & gloss. Follow this with a routine maintenance program using NuPower II® & NuGlaze®.

**NuGlaze®** Paint glosser & UV protectant for new or like new condition paint surfaces. Creates easy to clean surface, repelling bugs, stains, soil, oil, carbon. Use small amount "AS IS" (do not dilute) on oxidized paint after preparation with NuPol® and/or NuPower II®.

**CitriCut® Xtra** Loosens & emulsifies dirt/oils & enhances paint gloss in single step. Use full strength or diluted depending on the extent, condition & soil type. Use as a DryWash and/or Hand Wash/Wax for local spot cleaning.

Most DryWash products are used AS IS - directly out of container and NOT diluted. It's best to begin with new/clean bonnets, pads, mop heads & cloths.

### Everything for a SHOWROOM SHINE

#### DELUXE Paint Care Polish Kit

- Random orbital polisher
- 6" applicator bonnets
- 6" terrycloth bonnets
- 6" wool bonnet
- 6" microfiber bonnets
- 6" foam bonnets
- NUPOWER II®
- NUPOL®
- NUGLAZE®
- CITRICUT® XTRA
- Weekender bag

Also Available: Tools, Pads, Cloths, Mops, & Polishing Accessories...**PLUS** • ORBITAL POLISHERS • FINISH BUFFERS • BONNETS • CLEANING PADS • & MORE!

The type & extent of soiling, time, economics, program benefits and final desired appearance are the factors determining best cleaning applications.

When using any polishing product, refer to appropriate procedures & manufacturers' recommendations for use & equipment, or contact a polishing technician for more information, unique applications & special requirements.
